

# Railings

**Vinyl (PVC)** – Polyrail Systems by Digger Specialties provide many options for your vinyl railing including two colors, white and tan. From decorative posts and spindles to the simplicity of square or rectangle rails and pickets, Polyrail Systems is sure to appeal to the most discriminating homeowner. All posts and rails are reinforced for strength and safety. Hidden screws and the bracketed mounting system make it a beautiful choice

for any application. Posts are reinforced with steel pipe, a flanged aluminum post mount or sleeved over a 4x4 treated wood post. This material is easy to assemble for a Do-It-Yourself project. Rails can be purchased in increments from 4' through 16' therefore keeping the waste to a minimum. It is maintenance free, and with a transferable lifetime warranty you will be able to enjoy the beauty without worry. Please review Digger Systems Railing Brochure for additional information.

**Ornamental Aluminum**—Superior Aluminum and Westbury Aluminum Railing by Digger Specialties are our featured manufacturers for this type of railing. Superior offers various grades of railing that will meet every need. Your aluminum railing can be complimented with beautiful decorative picket inserts or scrolls. Westbury Railing offers premium architectural grade durability, easy assembly for Do-It-Yourselfers, and a lifetime warranty for piece of mind. Posts are installed either by setting in concrete footers, core drilled holes, or by having post flanges bolted to the surface of existing concrete or wood. It is available in nine beautiful finishes that add a distinctive touch to any home. And, it's maintenance free! Please review Superior Aluminums Railing and Westbury Aluminum Railing Brochures for additional information.

**Welded Steel**—This type of railing is fabricated in our welding shop to fit your exact specifications. Made of solid steel, the railing can be finished with a powder coating, primer paint, or primer and finish paint. Posts are 1" x 1" solid steel with 1/2" x 1/2" solid steel pickets. Posts can be installed in the same fashion as the ornamental aluminum railing.

**Pipe** – Fabricated from galvanized or bare steel hollow pipe. Schedule 40 pipe is recommended. The railing can be made by welding the components or utilizing special fittings (Kee Klamp Fittings). Typically the galvanized finish is preferred. We can primer and finish paint a color of your choice. The Kee Klamp fittings are great for the Do-It-Yourself project as exact dimensions and welding are not needed.
